Masonry Restoration-

Louis Masonry and Stucco has trained in numerous techniques for **residential, commercial and historic preservation and restoration of masonry structures**. Our skilled masons can **reproduce historic joint finishes in durable lime mortars and other original materials**. Whether **CONCRETE, STONE, BRICK, OR Terra Cotta**, we endeavor to introduce repairs into the **masonry structure** which will disappear seamlessly into the original work.

Our **reputation is crucial** and we depend on the **reliable delivery of top quality work in an efficient and responsible manner**. Our **goal** is to keep your **project on budget and on schedule**. To this end, we continue to invest in the **most modern equipment** for ongoing and keep projected to the future and to train in the **latest techniques and materials**. We bring a **comprehensive focus to every operation** and will **furnish a clearly stated method of handling your project**. You can depend on our **quality control** for your next **masonry restoration, masonry construction** and related operations

RESTORATIONS, STONE, CONCRETE, BRICK

Masonry Demolition-

Louis Masonry and Stucco performs residential and light commercial demolition, paving and sidewalk removal, and light excavation. We have several jack hammers and demolition tools machines to be versatile and perform the complete project from the excavation through the masonry walls to concrete sidewalks and patios and above grade work for smaller additions. Louis Masonry and Stucco specializes in remodeling and renovation masonry, cutting in new door or window openings in existing masonry walls in facilities with minimal disturbance to staff and customers is something that is done routinely. Cutting and removing concrete floors for new plumbing or on bigger projects, such as needing machine bases or pits, can be handled completely in house and with greater economics when handled by one contractor
