The Charleston Regional Hazard Mitigation Project Committee announced it has updated and finalized the [2012-2013 Charleston Regional Hazard Mitigation Plan](#). The plan has the third highest scoring in the U.S. under the [National Flood Insurance Program Community Rating System \(CRS\)](#) program, which scores communities on an insurance rating schedule and provides flood insurance premium discounts to residents and businesses based on this scoring.

Due to the plan's high score and other CRS activities performed by local governments, approximately 68,000 flood insurance policies held by residents and business owners in Charleston County are discounted by a total of nearly \$9.9 million per year. The Charleston Regional Hazard Mitigation Plan is frequently referenced by FEMA as a model plan for other government jurisdictions when preparing or updating their plans.

"The Hazard Mitigation Plan is an integral element in providing enhanced protection of people and property and ensuring that all participating jurisdictions within the County are eligible for federal pre and post disaster funding programs," said Carl Simmons, Director of [Charleston County's Building Inspection Services Department](#). "The plan is a prerequisite for local government entities within Charleston County to be eligible for federal financial disaster assistance and for entry into the National Flood Insurance Program Community Rating System, which provides flood insurance discounts to homeowners and businesses."

The plan was originally developed and adopted in 1999, and has been updated each year since to keep it current with federal requirements. This year, the plan has been updated to include hazardous events such as floods, coastal storms, extreme heat, tornadoes and hazardous material situations that occurred between May 2011 and April 2012. Revisions were also made to the [Hazard Assessment, Problem Assessment](#) and [Possible Activities](#) sections of the plan, and to committee member lists due to personnel changes. Government entities that have adopted the plan prepared status reports and action plans for 2012-2013 to be included in the plan.

[Charleston County Government](#) coordinates the committee that updates the plan, which has membership from all local government entities in Charleston County, including municipalities and special purpose districts, as well as numerous other representatives from private, public and non-profit sectors.

The following entities within Charleston County have adopted the *Charleston Regional Hazard Mitigation Plan*:

- [Unincorporated Charleston County](#)
- [Charleston County Parks and Recreation Commission](#)
