

NASA Professional Speakers

Caleb Fassett

Caleb is a planetary scientist at the NASA Marshall Space Flight Center in Huntsville, Alabama. He focuses on providing engineering projects with the planetary science knowledge and pursuing research about the Moon, Mars and Mercury.

Marcia Lindstrom

Marcia leads the Strategic Communications Team for NASA's Space Launch System (SLS). From the NASA Marshall Space Flight Center, she coordinates messaging and education and outreach efforts in support of America's next heavy-lift vehicle as part of the Artemis Program effort to put the next man and first woman on the surface of the Moon.

Debbie Martínez

Debbie is the Execution Manager for the Transformative Aeronautics Concepts Program (TACP)/Convergent Aeronautics Solutions (CAS) Project. The CAS project conducts short-duration research activities to establish early-stage concepts and the feasibility of technology with high potential to solve key barriers associated with large-scale aeronautics problems. She has been an Engineer Project Manager supporting NASA aeronautics and space exploration missions at NASA Langley Research Center since 1990.
